Shahd Ahmed Mahmoud Ewais

Full Stack Developer

Cairo, Egypt | 01129759412 | shahd45673@gmail.com | LinkedIn | GitHub

Professional Summary

Fresh Graduate in Computer and System Engineering actively seeking a Full Stack Internship or Junior Developer role. Experienced in building RESTful APIs using Node.js, Express.js, and MongoDB, as well as developing modern frontend interfaces with React and Next.js. Skilled in authentication, data validation, clean architecture, and component-based UI development. Strong communication and teamwork skills with experience collaborating in cross-functional teams and adapting to existing codebases.

Education

B.Sc. in Computer and System Engineering *Jul 2026*

Capital University (formerly Helwan University) — Cairo, Egypt — Cumulative Grade: 86.55% (Excellent)

Projects

University Management System — Graduation Project | GitHub *Jan 2025 – Jul 2026*

Node.js · Next.js · MongoDB · AI Integration

- Led a cross-functional team of 5 members, coordinating tasks across Backend, Frontend, Mobile, AI, and Design tracks
- Solely developed the Frontend using Next.js, and collaborated with a team member on the Backend REST API using Node.js and Express.js
- Implemented course registration, assignment submission, grade management, and attendance tracking modules
- Integrated with AI (chatbot & face recognition), mobile (Flutter), and UI/UX (Figma) tracks

Social App Backend | GitHub *Apr 2026 – Present*

TypeScript · Express.js · MongoDB · Zod · JWT

- Designing and implementing a RESTful API for a social networking application from scratch
- Applying JWT-based authentication and role-based authorization to secure all endpoints
- Using Zod for strict request validation and enforcing clean separation of concerns across layers

E-Commerce Backend | GitHub *Jun 2026 – Jul 2026*

NestJS · TypeScript · MongoDB · JWT

- Built a modular NestJS backend with dedicated modules for auth, product, category, brand, cart, coupon, review, and mail
- Implemented authentication and secured endpoints following NestJS's layered architecture (controllers, services, modules)
- Integrated cart, coupon, and email notification services to support end-to-end order and customer workflows

E-Commerce Web Application | GitHub *Sep 2025*

Next.js · React · JavaScript · Bootstrap · REST APIs

- Built a full e-commerce platform with product, category, and brand management pages
- Implemented authentication flows, wishlist/cart functionality, and dynamic UI interactions
- Integrated RESTful APIs, online payment, and order management across the application

Certifications & Training

- Front-End Web Development — Route – ★ Egyptian Engineering Syndicate Accredited
- Web Development using React — Information Technology Institute (ITI), Aug – Sep 2025
- Backend Development with Node.js — Route IT Training Center, 2025 — Completed (certificate pending)

Technical Skills

Languages: JavaScript (ES6+, ES Next), TypeScript, Python, C++

Frontend: React, Next.js, HTML5, CSS3, Bootstrap5, SASS, Material UI, jQuery, AJAX, DOM & BOM

React Ecosystem: React Hooks, React Router, Context API, Axios, Formik & YUP, React Query, TypeScript with React

Backend: Node.js, Express.js

Databases: MongoDB (NoSQL), MySQL, SQL Server, Redis

Auth & Validation: JWT, Zod, Joi, Multer

AI Dev Tools: Cursor, Claude — used to write, review, and accelerate frontend code

Tools: Git, GitHub, Postman, VS Code, Figma, AWS (S3)
Concepts: REST APIs, Authentication & Authorization, MVC Architecture, OOP, API Security, Data Structures, Debugging, Coding Standards
